

Natural.

Nourishing the world with India's finest agricultural commodities. We bridge the gap between rich, sustainable farmlands and global markets through uncompromising quality and seamless logistics.

www.ceralisglobal.com

**BEYOND RELIABLE
PARTNER**

At CERIALIS GLOBAL, our supply chain begins at the very roots of India's most fertile agricultural zones. We have built strategic, long-term partnerships with trusted farming communities and agricultural cooperatives across Gujarat and the wider Indian subcontinent. By sourcing our raw materials directly from the farm gate, we eliminate unnecessary intermediaries. This direct-procurement model guarantees complete traceability of our millets, pulses, and grains, giving our international buyers absolute confidence in the origin and integrity of their imports.

We ensure our agricultural partners strictly adhere to sustainable, export-compliant farming practices. Every crop undergoes stringent quality assessments at the source for optimal moisture and health, guaranteeing commodities that consistently exceed global market standards.

Sourcing & Origins

Robust warehousing and advanced storage are the backbone of our secure export capabilities.

Infrastructure & Reliability

Upon arrival from the fields, all commodities are secured in our advanced, hygienic warehousing facilities. This robust infrastructure is continuously monitored to prevent degradation, infestation, or cross-contamination, ensuring the raw harvest remains in absolute pristine condition before final processing.

We possess the operational bandwidth to execute high-volume contracts without compromising consistency. By maintaining strategic buffer stocks, CERALIS GLOBAL easily absorbs seasonal market fluctuations to guarantee our international B2B partners a secure, uninterrupted, and highly reliable year-round supply chain.

Premium Agro Commodities

Our extensive portfolio encompasses top-tier rice varieties, nutrient-dense millets, and premium pulses. Every commodity is carefully curated to support the diverse needs of global food markets.

Whether sourcing aromatic Basmati, resilient Sorghum, or high-protein legumes, our universal quality mandate remains absolute. We meticulously grade all agro-products for uniform size, color, and nutritional integrity, tailoring our bulk processing to perfectly match your specific regional import requirements.

Precision Processing

Equipped with state-of-the-art optical sorting technology, our processing lines ensure that bulk packaging is entirely free from foreign matter. This meticulous attention to detail preserves the natural shelf-life, moisture levels, and nutritional integrity of every shipment. From initial screening to final bagging, our quality control protocols are designed to meet the strictest European and Middle Eastern food safety import regulations.

RICE

Basmati Rice

Renowned globally for its distinctive aroma, slender grain length, and fluffy texture. Aged to perfection, our premium white Basmati guarantees an exquisite culinary experience for high-end dining markets.

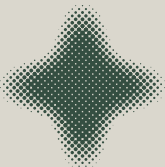

IR-64 Raw White Rice

A highly sought-after long-grain variety known for its affordability and excellent cooking volume. Double-polished and sortex-cleaned, making it the ideal staple for mass catering and wholesale distribution.

IR-64 Parboiled Rice

Processed using advanced thermal techniques to lock in nutrients and ensure firm, non-sticky grains. Highly resistant to breakage, making it perfect for demanding global food service industries.

RICE

Brown Basmati Rice

Unpolished to retain its nutrient-rich bran layer, this whole grain offers a nutty flavor profile and high fiber content. The preferred choice for health-conscious consumers and premium retail.

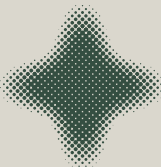

Red Rice

A culturally rich whole-grain variety prized for its deep natural pigmentation, complex earthy flavor, and superior antioxidant properties. Sourced directly from pristine soils for niche, health-focused buyers.

Sharbati/Sugandha Rice

A highly cost-effective alternative offering a visual appeal and elongation remarkably similar to traditional Basmati. Aromatic and perfect for buyers seeking premium aesthetics at highly competitive wholesale pricing.

RICE

Short-Grain Sticky(sushi) Rice

Cultivated for its plump, translucent appearance and superior starch content. Yields the perfect sticky consistency required for authentic East Asian cuisine, sushi preparation, and specialized culinary applications.

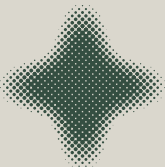

Short-Grain White Rice

A versatile, softly textured grain that cooks to a tender, slightly clinging finish. Carefully milled for maximum purity, serving as a reliable staple for traditional regional dishes worldwide.

1121, 1509, 1401, 1718, Pusa, Sona Masoori, Broken Rice

From the extraordinary elongation of 1121 Basmati to lightweight Sona Masoori and meticulously graded 100% sortexed broken rice, We supply exact grain specifications to meet diverse global manufacturing requirements.

WHEAT

Sharbati Wheat

Known as the 'Golden Grain,' this premium wheat offers superior sweetness and a softer texture. Sourced from fertile plains, it's the ultimate choice for high-end artisanal flour and bakery products.

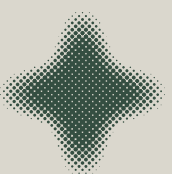

Lokwan Wheat

A highly robust, versatile grain offering excellent milling yield and gluten strength. Perfect for industrial-scale flatbread production, blending, and everyday nutritional staples for global markets.

Durum Wheat (*Triticum durum*)

An exceptionally hard wheat variety with high protein content and golden color. The global industry standard for manufacturing premium pasta, couscous, and Mediterranean culinary staples.

WHEAT

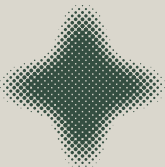

Hard Red/Golden Bread Wheat (HD 2967 & HD 3226)

Engineered for superior baking performance, this high-yield grain boasts an optimal protein-to-gluten ratio. Ideal for commercial bakeries demanding consistent dough elasticity and loaf volume.

PBW Varieties (Punjab Wheat)

Sourced from India's agricultural heartland, these disease-resistant grains provide reliable, bulk-scale nutrition. Rigorously cleaned to ensure maximum purity for global milling and food processing sectors.

MAIZE(CORN)

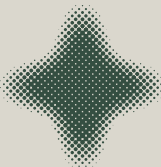

Yellow maize(Yellow corn)

Rich in beta-carotene and essential carbohydrates, our bulk yellow maize is rigorously tested for moisture and aflatoxins, making it ideal for premium animal feed and industrial starch processing.

White maize(White corn)

A food-grade staple prized for its sweet, neutral flavor and soft starch structure. Extensively sorted for human consumption, making it ideal for flour, tortillas, and global culinary applications.

GROUNDNUT

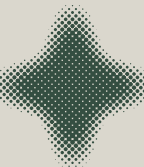

Bold (Runner)

Characterized by their large, uniform size and rich oil content. These premium peanuts are meticulously graded for the snacking industry, confectionery, and high-quality peanut butter manufacturing.

Java (Spanish)

Smaller, rounder, and exceptionally rich in flavor and oil yield. Our Java peanuts are the preferred choice for industrial oil extraction, crushed snacks, and premium culinary roasting.

GROUNDNUT

Red Natal

Distinctive for their deep red skin and sweet flavor profile. Carefully harvested and sorted to serve niche culinary markets, gourmet snacking, and specialized dietary retail brands.

Kadiri-2, Kadiri-3, GG-20, GG-21, TJ-37, GAUG-10

An extensive portfolio of regionally specialized, high-yield groundnuts. Offering precise oil-to-protein ratios, these variants support diverse international requirements ranging from commercial crushing to direct culinary consumption.

ANCIENT MILLETS

Pearl Millet

A highly resilient, climate-smart superfood boasting exceptional iron and fiber content. Processed for maximum purity, this gluten-free grain is perfect for modern health-conscious retail and traditional foods.

White Sorghum (Milky/Snow White)

Visually striking and neutrally flavored, this premium milky-white grain is a highly sought-after gluten-free wheat alternative. Ideal for commercial baking, brewing, and specialized dietary food production.

Red Sorghum (Feed & Industrial Grade)

A robust, high-tannin grain delivering excellent nutritional value at scale. Thoroughly screened to meet international safety standards for premium poultry feed, livestock nutrition, and industrial ethanol.

ANCIENT MILLETS

Non-GMO Sorghum – Premium Natural Grade

Cultivated strictly without genetic modification to satisfy stringent European and organic-leaning markets. Delivers uncompromised natural purity, making it ideal for clean-label food and beverage brands.

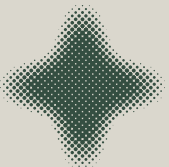

Yellow Sorghum (CH-5)

A vibrant, nutrient-dense variety offering an excellent balance of proteins and antioxidants. Highly versatile, it serves dual purposes in both specialized animal nutrition and regional culinary processing.

Finger Millet

An ancient nutritional powerhouse loaded with calcium and amino acids. Machine-cleaned and safely packed to preserve its rich, malty profile for global baby food and health-supplement markets.

PROTEIN-DENSE PULSES

Kabuli Chickpeas (white/cream-colored, large)

Premium, large-caliber chickpeas prized for their creamy texture and uniform color. Perfectly graded to meet the rigorous aesthetic and culinary demands of international hummus and canning industries.

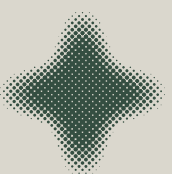

Bengal Gram (small, dark brown/black, rough-coated)

A robust, protein-packed legume essential to global diets. Meticulously cleaned to remove impurities, offering excellent splitting characteristics for commercial milling into premium gram flour (Besan).

Red Lentil

Fast-cooking and highly digestible, these split lentils are an international dietary staple. Sortex-cleaned for brilliant color consistency and zero foreign matter, ensuring premium retail-ready quality.

PROTEIN-DENSE PULSES

Whole Red Lentil

Also known as "Football Lentils," these are de-husked but kept entirely whole. This specific grade provides an exceptional shelf life and a unique texture, making them a high-demand item for specialized culinary exports.

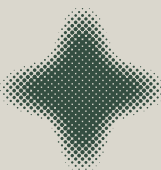

Kidney Beans

Large, visually striking beans with a deep red hue and firm texture. Carefully polished to a high shine, serving as the ideal bulk ingredient for canning, chili production, and global food service.

Green Mung

A highly versatile, fast-cooking bean rich in plant-based protein. Precision-sorted to guarantee uniform green coloration and high germination rates, perfect for both culinary use and commercial sprouting.

PROTEIN-DENSE PULSES

Pigeon Peas

A cornerstone of plant-based protein diets. We procure and process pigeon peas to ensure they are free from moisture-related defects, providing a reliable, high-yield product for global importers and millers.

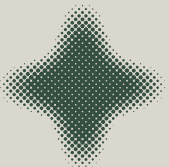

Whole Pigeon Peas(without shell)

De-husked to perfection, this golden-yellow pulse offers reduced cooking times and high digestibility. A staple export product rigorously sorted for absolute visual and culinary consistency.

Whole Black Lentil

Prized for its rich, earthy flavor and high mucilaginous content which creates a creamy texture when cooked. Our black lentils are cleaned to a high luster, serving the most demanding authentic culinary markets.

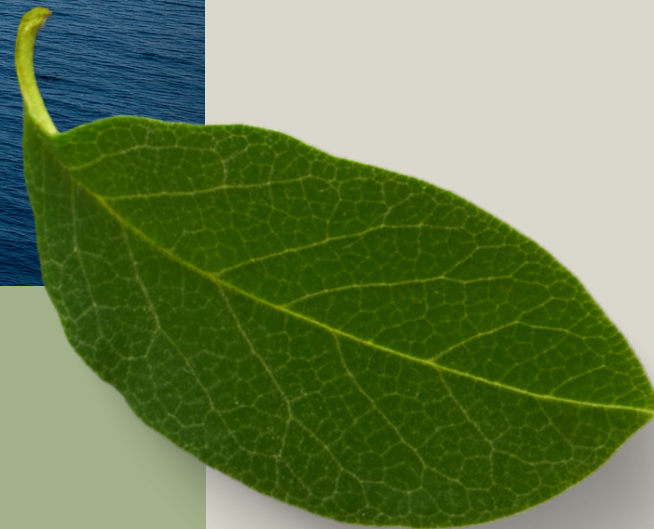

Global Logistics

Exporting is more than just shipping products; it requires precision and reliability. We manage end-to-end supply chain logistics, ensuring secure and timely transit from our Rajkot facilities directly to your required destination port.

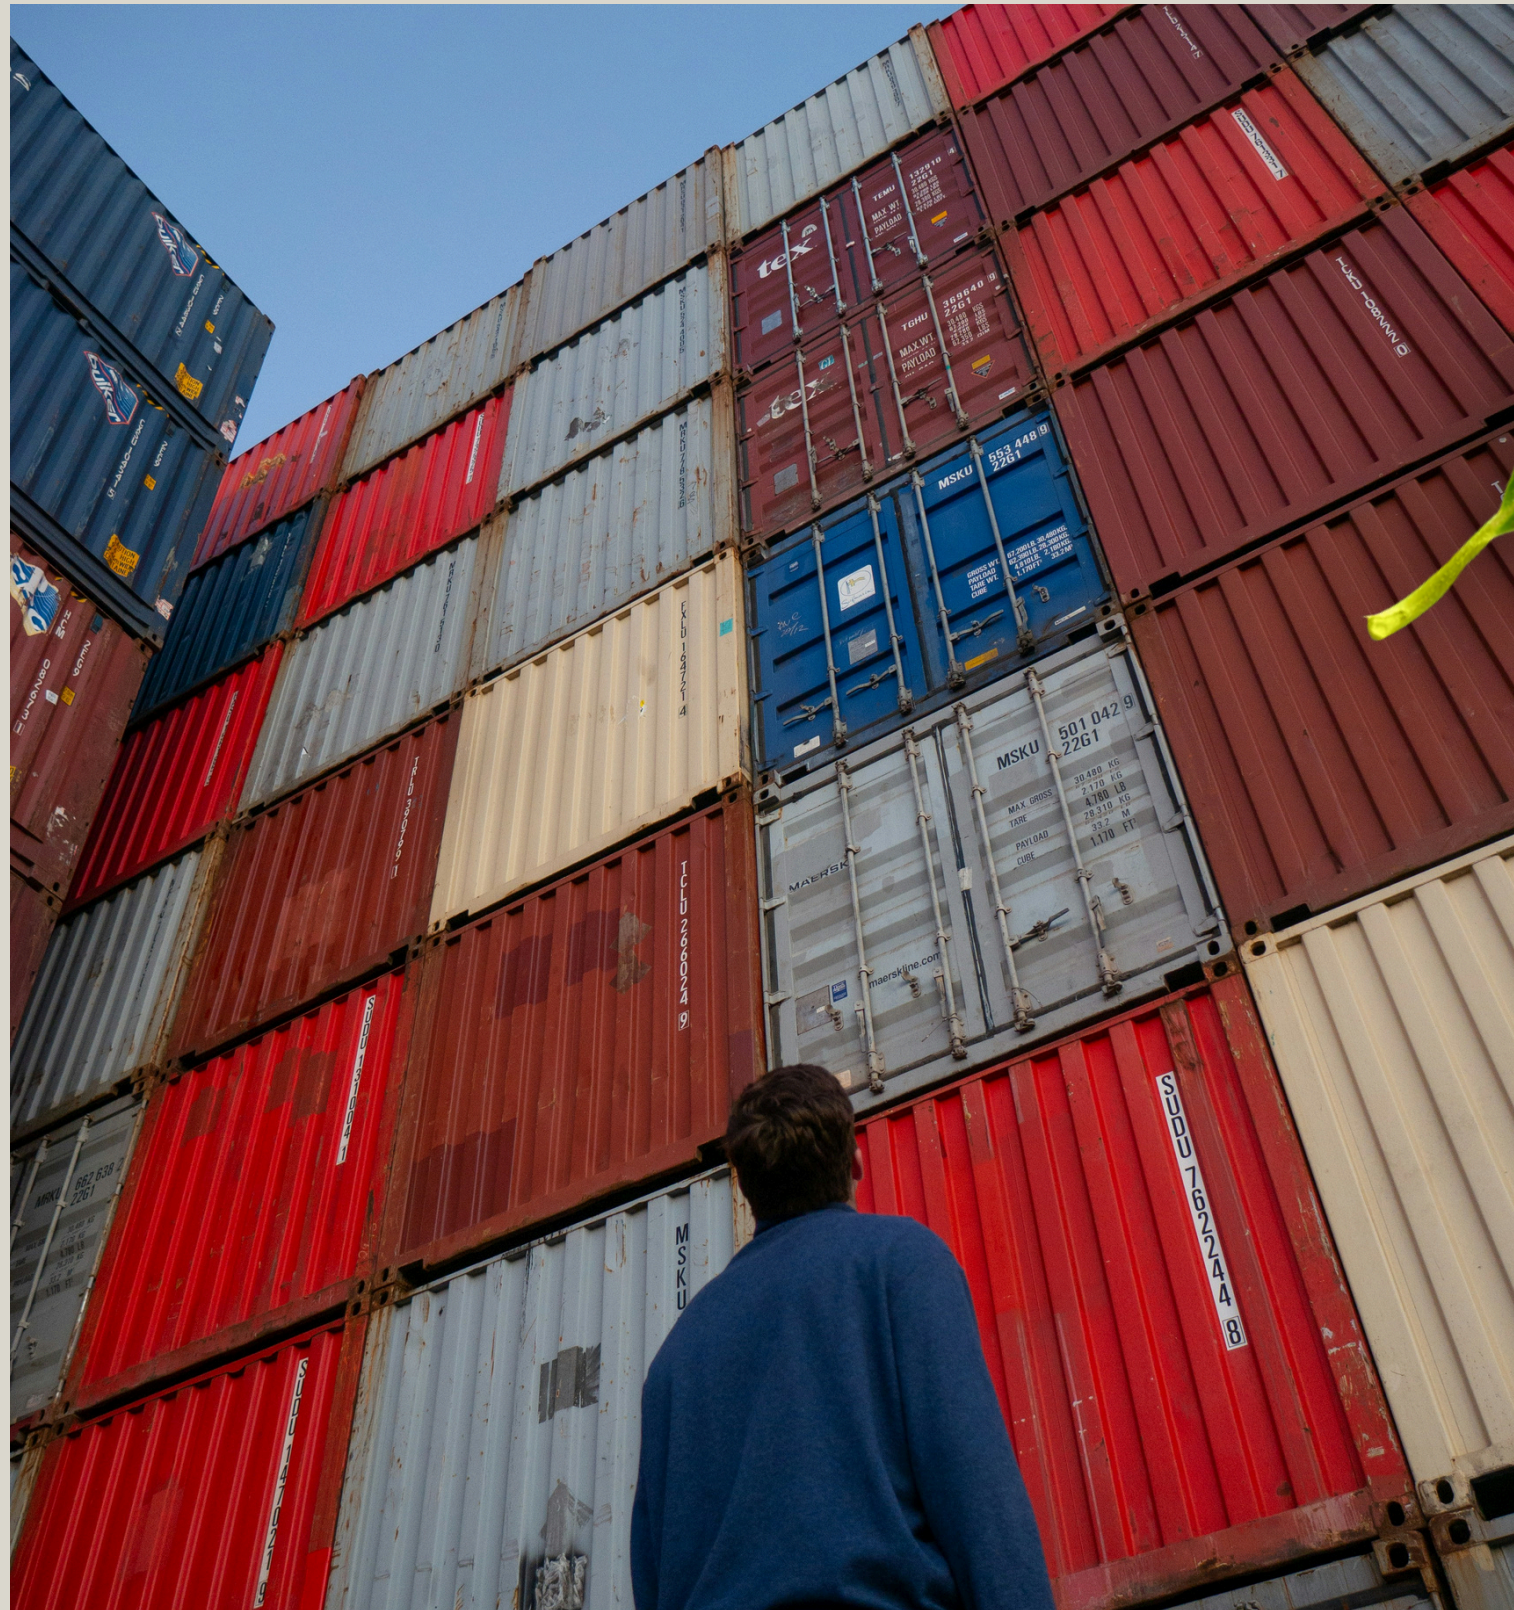

Our dedicated in-house trade desk expertly handles all stringent export documentation. From complex customs clearance procedures to mandatory phytosanitary certifications, we provide a frictionless, risk-free import experience for all our international clients.

We partner with leading global freight forwarders to guarantee that your cargo is prioritized, fully insured, and tracked at every stage of its ocean voyage.

Our Responsibility

As a global agro-commodity exporter, our responsibility extends beyond mere transactions. We are deeply committed to ethical sourcing, empowering local Indian farming communities while maintaining sustainable agricultural practices that protect our environment for future generations.

Furthermore, we take full accountability for your cargo's safety. By enforcing strict quality controls and utilizing eco-conscious, food-grade packaging during containerization, we ensure every shipment arrives in pristine condition, protecting both consumers and your reputation.

Connecting Markets

Strategically positioned to leverage major Indian seaports like Mundra and Kandla, our export operations are fundamentally optimized for maximum scale, rapid deployment, and unwavering logistical reliability.

Partner with an established export house that truly understands the fast-paced velocity of global trade. We actively build long-term, high-volume partnerships across Europe, the Middle East, and emerging global markets.

At CERALIS GLOBAL, we don't just supply commodities; we deliver absolute confidence. Contact our trade desk today to secure a consistent, premium agricultural supply chain for your enterprise.

Thank You.
